

# AGL | Big Data

## Automatic Warehouse for GLT's

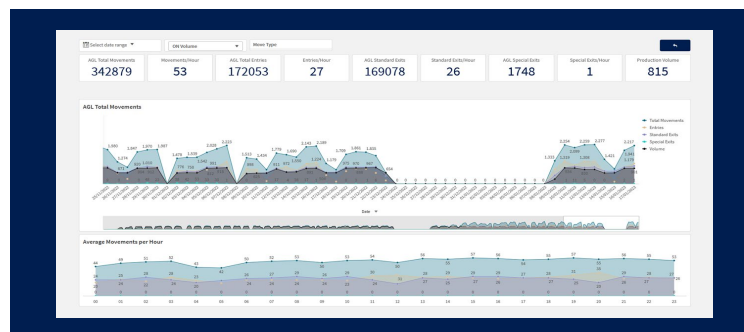

### Before

### Description

- Raw and unstructured data from multiple sources
- Various sources of raw data not consolidated and transformed into information

### After

- Qlik Sense Dashboard
- Various data sources consolidated in one dashboard
- Operation overview with multiple KPI's
- Analysis for potential optimizations and performance enhancements

### Results and improvements

Easy to use and user-friendly information in one source; warehouse performance enhancement and insights for optimizations
