

# Digital Enamel

## Quality improvement

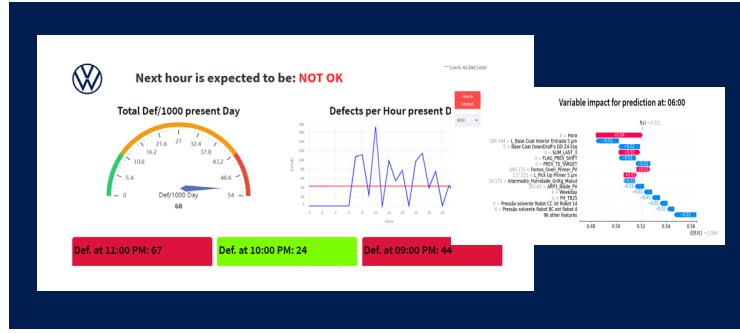

### Before

No graphics available

### After

### Description

- Correlation was done manually between defects in CP5A and process inputs in clean room
- IA algorithm identifies the impact of each process input in the defects output

	Facts
Area	Paintshop <span style="background-color: #800080; border-radius: 50%; padding: 2px 5px;">5</span>
Saving	N/A
Investment	31K €
Implementation date	POC 2023 Full 2024

### Results and improvements

Productivity and Increase capacity
